Objective: To contribute in a Department of Defense Program in the capacity of a Program / Project Management & Leadership role and help drive and assist in the organization's success, by utilizing my past experiences and expertise in DoD space and similar commercial programs.

Qualifications:

- Extensive project management/responsible engineer experience, managing DoD space based payload & spacecraft processors Integration & Test - MIL-STD 1750A, and Survivability Testing; including Flash X-Ray & EMI/EMP - MIL-STD 461E/464 & RTCA-DO-160D
- Continued ad-hoc on orbit support for Milstar payload & spacecraft processors
- Complex program & project management in situations of high visibility; DoD and corporate programs & projects, process Improvement, software projects, as well as sub-contracted vendor management, with multi million-dollar budgets, including successful assumption of out-of-scope situations in need of critical turnaround
- Proposal /Program/Project solution generation and execution in business process re-engineering
- Multi-Project management experience, while keeping all on-time and in-scope, in addition to applying rational analytical problem solving techniques
- Program and Project Management of Siebel and integration programs in Sales and CRM
- Project Management of re-engineering processes with B2B and inter-business technology integration, reducing procurement cycle times 50% with 40% accuracy increase
- Proficient interpersonal skills, oral/written communications and excellent presentations
- Secret / COMSEC in process of reactivation – EPSQ submitted 2003.02 – interim clearance expected 2003.03
